

Firmware Upgrade for DockUCPT01

The V7 Docking Station firmware can be updated with the downloaded file:

1. connect DOCKUCPT01 to a Windows computer and power on the dock
2. Open the "Update Tool",
3. Click "Upgrade FW"

4. Restart the dock as soon as the FW upgrading finish

The firmware update usually takes a few minutes. Please wait to make sure the firmware update is complete before restarting or issues can occur.
